## THE HAVAL H2. AS UNIQUE AS YOU ARE

At Haval, we understand life can sometimes be stressful. The Haval H2 incorporates advanced technology and equipment levels to ensure your journey is stress-free.

Step inside the Haval H2 and be welcomed into a world of luxury and comfort, with ample room to store everything you need for your journey.

With delightful touches such as the subtle mood lighting, soft touch materials and even a curbside camera on the LUX model, the H2 is designed with care.

Equipped with a 4 cylinder 1.5L turbo charged engine the H2 is powerful and economical. Designed with superior road comfort, the H2 feels solid and secure due to its sophisticated SUV suspension.

DRIVEN TO IMPRESS

**HAVAL H2**

## COMFORT & ENTERTAINMENT

With Haval's ergonomic and humanistic approach to design, the H2 is one of the easiest SUVs to enjoy. Designing the seats at an average hip-height provides easy entry and exit, so there's no awkward climbing as is often the case with many SUVs on the market. Behind the wheel you'll notice the comfortable upright driving position giving you enhanced vision of the road ahead and the logical placement of switches and controls make for easy driving.

The 3D fashionable multi-functional dashboard embodies a charming sense of technology and clearly shows the essential driving information, including instantaneous fuel consumption and remaining driving mileage. The centre console adopts the popular piano-lacquer materials, assisted by convenient storage room, atmosphere lighting and other features, creating a rare luxurious comfort.

## POWER & ECONOMY

The technologically-leading GW4G15B high efficiency and energy-saving engine boasts outstanding sporting performance. The 105kW maximum power output and 202N.m peak torque output can explode with instantaneous powerful performance.

## SAFETY & SECURITY

Haval H2 provides you with a top-level, all-round safety guarantee. In the event of accidents, the airbags deploy promptly to immediately relieve the impact forces applied on the front and side of the driver/front passenger, and thus minimize the harm to the driver/front passenger.

The Tyre Pressure Monitoring System (TPMS) monitors the tyre pressure in real time. This system is able to detect any tyre anomalies thus increasing the safety factor.

With the adoption of keyless entry, featuring advanced radio frequency identification technology, the chipset within the key automatically locks and unlocks the doors.
